

FARM NEWS

OBIS ONE LLC. | Pennsville, New Jersey

Our Story

We're the Lloyd family: Pat, Lisa and sons Wally and Quentin. We owned and operated Obisquahassit, New Jersey's oldest working farm and one of the oldest residences in the United States, dating to 1670. It took over 4 years to develop reliable, organic methods to make our black garlic products. Everything starts in the fields, where organic and sustainable practices rule.

We are often asked...why organic black garlic? The answer is simple: taste, health and the wow factor. Start off with a healthy food, create a culinary delight that elicits a "Wow!" when someone tastes it for the first time. So, how can we grow, ferment and age garlic, develop inventive products, educate kids and consumers, all right here, smack in the middle of the Mid-Atlantic region? That is our goal every day.

We have 100% control over every ounce of well water irrigation, organic fertilization, planting, harvest, curing, aging, packaging and distribution. Obis One also plants a myriad of specialty plants and edible flowers in rotation with our premium garlic and we have the ability to deliver the freshest, hard to find specialties. We actively support culinary teaching and learning, especially to K-12. Our motto is "Sharing the Goodness...Obis One".

So, what is Obis One Black Garlic?

Aged and Fermented Organic Raw Garlic | All Natural, No Additives | Black in Color, Sweet & Savory in Flavor | Soft Like Dried Fruit | No Garlic Breath! | Twice the Antioxidants of Raw Garlic | Use in Sauces, Meats, Pizza, Veggies.

How Does the Garlic Get This Way, You Ask?

Believe us, nothing is added when we make artisanal batches of organic black garlic. Heat, humidity and vacuum create an environment that lets the natural sugars and enzymes within the garlic do its own thing. What's more, the shelf life of our black garlic bulbs and cloves is a minimum of 6 months at room temperature, but we hope you like to eat and cook with them so much they'll be gone long before then!
